

## IMPORTANT NOTES FOR USERS

The sheets in this box are finished with self-adhesive patches which have a recommended shelf-life of two years.

Storage conditions are critical to this and failure to store as recommended could result in damage to the sheets and/or a reduced shelf-life.

### STORAGE INSTRUCTIONS

- ✓ For best runability unused sheets should be removed from the printer tray and stored in the original box with the lid on.
- ✓ Boxes should be stored no more than 5 boxes high after delivery and should not be stored on their edges.
- ✓ Boxes should be stored within a temperature range of 10°C to 25°C, a relative humidity level of 35-65% and not exposed to sunlight.

### HANDLING INSTRUCTIONS

- ✓ Sheets should be fanned prior to use to ensure smooth running through your inkjet or laser printer.
- ✓ Ideally the sheets should always be picked up by the printer paper end first. Please refer to the 'FAQ' page on our website for further details.

Liability will only extend to replacement of faulty goods where it is proven that the correct storage procedures have been followed.
